DETAILED ACTION

Specification

The disclosure is objected to because of the following informalities: there are numerous grammatical errors throughout the specification and claimed language. Appropriate correction is required.

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "said units." There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

Application/Control Number: 09/772,919

Art Unit: 2143

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 8-10 and 16-17 are rejected under 35 U.S.C. 102(e) as being anticipated by US Publication Application No. 2004/0095237 submitted by Chen et al. (hereinafter referred to as Chen).

Regarding claim 8, Chen teaches a terminal equipment adapted to be connected to an administrative unit comprising:

memory for storing data associated with said terminal equipment [0054];

display means for displaying a terminal processing rotation message from said administrative unit [0137];

input means for operating said terminal equipment in accordance with a direction of said message so displayed [0187]; and

control means for executing a backup process of said data stored in said memory on said administrative unit by performing a rotation operation in accordance with a direction of said message [0187].

Regarding claim 9, Chen teaches a terminal equipment as set forth in claim 8, wherein after having executed said backup process of said data stored in said memory on said administrative unit, said control means downloads data associated with another terminal equipment which is backed up in said administrative unit on said memory [0187].

Application/Control Number: 09/772,919

Art Unit: 2143

Regarding claim 10, Chen teaches a terminal equipment as set forth in claim 8, wherein said control means sends a reply message indicating that said terminal equipment is in operation when said control means receives an operation confirming message [0057].

Regarding claim 16, Chen teaches a computer readable recording medium having recorded therein a program for rendering a computer connected to an administrative unit to execute:

receiving a rotation message from said administrative unit [0187]; and performing a backup process of data stored in said computer onto said administrative unit through rotating operation in accordance with a direction of said message [0187].

Regarding claim 17, Chen teaches a computer readable recording medium as set forth in claim 16, having recorded therein further a program for rendering said computer to execute: downloading another data stored in said computer from said administrative unit for storage [0187].

Allowable Subject Matter

Claims 1-7 and 11-15 are allowed.

Claim 1 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Regarding independent claims 1, 4, 7, 11, 12 and 14, the prior art of record does not teach, in combination with the other limitation in the claims, means for determining rotation

candidates among the plurality of terminal equipments with a view to equalize the accumulated operating times of said respective terminal equipments, and directing said rotation candidate terminal equipments to perform a backup process of said stored data.

The claims not mentioned are dependent claims, which depend on allowed dependent claims, therefore are also allowed.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- 1. US 6460055 B1 issued to Midgley, Christopher et al.
- 2. US 6438563 B1 issued to Kawagoe, Teruyuki
